Pedro Sakamoto

Full Stack Developer · Node.js, TypeScript, React and Java/Spring Boot

Ribeirão Preto, Brasil pedrosakamoto27@gmail.com pedrosakamoto.site github.com/2jjj linkedin.com/in/pedro-sakamoto-3b94091a1

SUMMARY

Full stack developer based in Ribeirão Preto, Brazil, studying Computer Engineering at Unaerp. I build from database to interface: a WhatsApp sales bot in operation, an import SaaS with Pix checkout and a dashboard that automates my own job search. Available now for an internship, junior role or freelance project.

SKILLS

Frontend	React, TypeScript, JavaScript, Next.js, Tailwind CSS
Backend	Node.js, Express, Java, Spring Boot, REST APIs
Data	PostgreSQL, SQLite, Supabase
DevOps	Docker, Git, GitHub Actions, Linux, Vercel
Quality	Automated tests, Playwright, CI

EXPERIENCE

Full Stack Developer — freelance and independent projects

- WhatsApp sales system for a martial arts store: catalog with 219 products and 568 variations, inventory, orders and an operations dashboard, covered by 63 automated tests.
- Import SaaS built with React, TypeScript and Supabase, with Stripe checkout (card, Pix and boleto), signed webhooks and payment reconciliation.
- StartANewDay: Node.js/Express and React dashboard that finds jobs, scores fit and generates a PDF resume — used in my own internship search.
- 20+ public repositories with tests, continuous integration and documentation; readable code is part of the delivery.

PROJECTS

Kamikaze Bot · TypeScript · Node.js · Baileys · Hono · SQLite · Docker

WhatsApp sales system for a martial arts store: catalog with 219 products and 568 variations, inventory, orders and an operations dashboard.

ImportFlow · React · TypeScript · Supabase · Stripe · Edge Functions

Import management SaaS with Stripe checkout (card, Pix and boleto), signed webhooks and payment reconciliation.

StartANewDay · Node.js · Express · React · Playwright · AI

Career dashboard that searches public job boards, scores fit against the profile and generates a PDF resume automatically.

pomodoro-foco · React + TypeScript

github.com/2jjj/pomodoro-foco

Minimal pomodoro timer that keeps your session count in local storage
